saveONenergy™

EHM Solutions insures your BAS System not only provides optimum comfort control but also saves you money.

The journey to energy efficiency does not end with the installation of a Building Automation System, it's only the beginning. The information generated by the BAS needs to be monitored and analyzed and acted upon in order to be effective. Substantial Hydro and Gas savings can be realized through low cost optimization strategies.

Services

- Building System Energy Audits
- Retro Commissioning
- Operator Training
- BAS Operating and Monitoring
